

# BUSHRA ALANDIJANI

Eager Software Engineering  
Student

## CONTACTS

[bbushraalandijani@gmail.com](mailto:bbushraalandijani@gmail.com)

+966549123341

## OBJECTIVE

Obtain a summer internship as a software engineer at a tech startup where I can apply my programming skills and learn more about the industry

## REFERNCE

Available upon request

## EDUCATION

BS in Computer Science, majored in software engineering  
Expected graduation: Jan 2024, University of Jeddah, GPA: 5.0/5.0

## PROJECTS

- Designed and developed a custom database for blood donations, which included data modeling, schema design, and implementing it.
- Designed and developed a user-friendly interface for a phone application, using best practices for user-centered design and collaborating effectively with multiple teams to ensure its success.
- Utilized Java programming language to develop a comprehensive reservation system, with a focus on performance optimization and scalability.
- Created an employee records system using Java programming language and database management techniques to make sure that the data was secure and easy to retrieve.

## EXTRACURRICULAR ACTIVITIES

- Volunteered in Department of Public Relations, Tanweer Club, University of Jeddah

## SKILLS

- **Programming Languages:** Java, Python & C.
- **Software Development Methodologies:** Have knowledge in Waterfall & Agile methodologies, with a strong understanding of Scrum Framework.
- **Data Structures & Algorithms:** Skilled in implementing data structures & algorithms in programming languages such as Java.
- **Database Technologies:** Experienced in working with databases such as MySQL & Oracle.
- **Communication:** Strong communication skills, with the ability to work effectively in a team environment.
